

# The APCC's Seasonal and Subseasonal Forecasting Activity

---

(Mar. 20, 2018)

Hae-Jeong Kim\*, Yoo-Rim Jung and Young-Mi Min  
APEC Climate Center

# Overview of the APEC Climate Center

Asia-Pacific Economic Cooperation (APEC) Climate Center (APCC) is a leading climate information service provider in the Asia-Pacific region. We provide seasonal climate forecasts and other climate information products and services, conduct research and development activities, and organize capacity building initiatives for scientists from developing economies.

*APEC Climate Center  
12 Centum 7-ro, Haeundae-gu, Busan, Rep. Korea*

# Mission of the APEC Climate Center

To enhance the socio-economic well-being of member economies by utilizing up-to-date scientific knowledge and applying innovative climate prediction techniques.

## Climate Prediction

APCC produces value-added, reliable, and real-time climate prediction information and provides the APEC region with it.

## Interdisciplinary Research

APCC leads in the development of interdisciplinary research and application techniques at the climate-environment-society nexus.

## Climate Information Services

APCC strives to be a key climate database center to distribute climate data, information products, and related tools.

## International Cooperation

APCC guides developing countries from the APEC region toward building their own capacity to produce reliable climate prediction information.

Climate Information

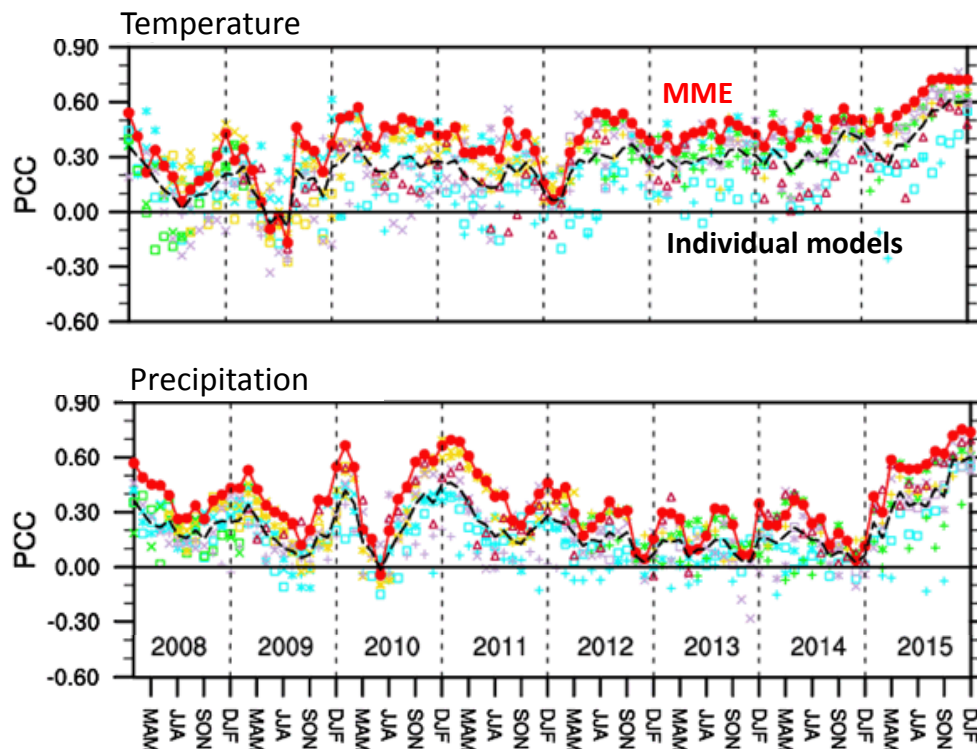

Information Service System

# Seasonal Forecast

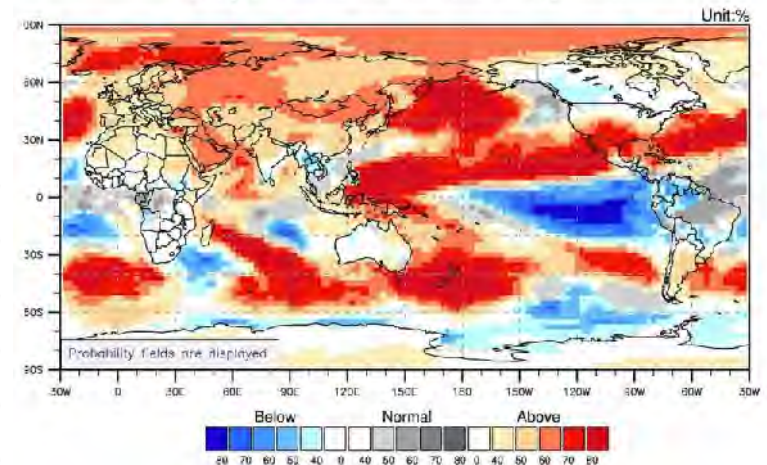

- Producing skillful real-time climate predictions and developing a value-added reliable climate prediction system based on a **Multi-Model Ensemble (MME)** technique.

Anomaly Pattern Correlation

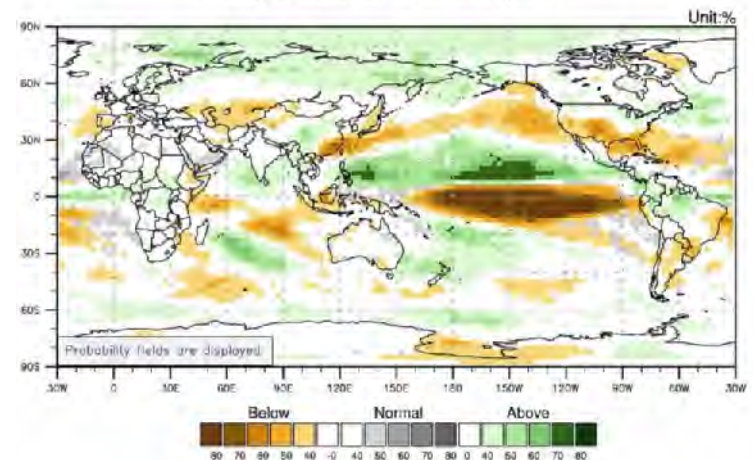

Min et al. (2017), Climate Dynamics

Temperature at 2m for March-May 2018

Precipitation for March-May 2018

# APCC MME Prediction System

- The world's largest MME system based on international cooperation to generate monthly rolling 3-month and 6-month MME climate outlooks.

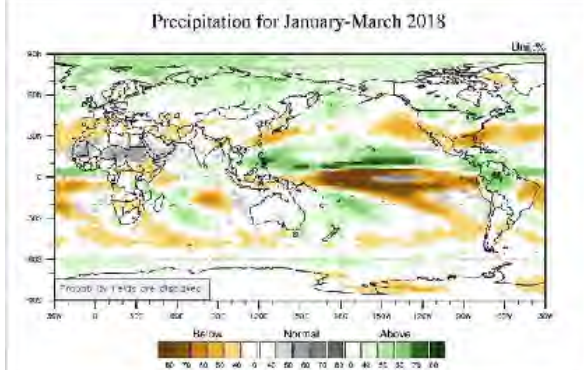

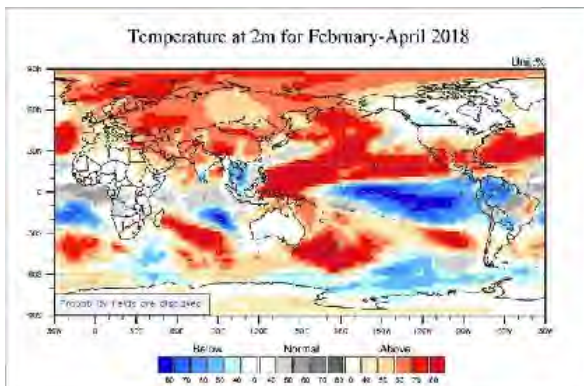

## Multi-institutional Cooperation

Economy	Organization/Institute
Australia	Bureau of Meteorology (BoM)
Canada	Meteorological Service of Canada (MSC)
China	Beijing Climate Center (BCC) Institute of Atmospheric Physics of China (IAP)
Chinese Taipei	Central Weather Bureau of Chinese Taipei (CWB)
Italy	Euro-Mediterranean Center on Climate Change (CMCC)
Japan	Japan Meteorological Agency (JMA)
Korea	Korea Meteorological Administration (KMA) Pusan National University (PNU)
Peru	Servicio Nacional de Meteorología e Hidrología (SENAMHI)
Russia	Hydrometeorological Centre of Russia (HMC) Main Geophysical Observatory of Russia (MGO)
UK	Met Office
USA	Center for Ocean-Land-Atmosphere Studies (COLA) International Research Institute for Climate and Society (IRI) National Aeronautics and Space Administration (NASA) National Center for Environmental Prediction (NCEP) / National Ocean and Atmospheric Administration (NOAA)

# Seasonal Forecast Products

- Monthly & Seasonal mean forecast of Tsfc, Prec, T850, Z500, SLP, SST, UV (deterministic & probabilistic)
- Verification results (hindcast, realtime forecast)
- ENSO Outlook

Expansion into subseasonal forecast  
*by providing BSISO real-time forecasts*

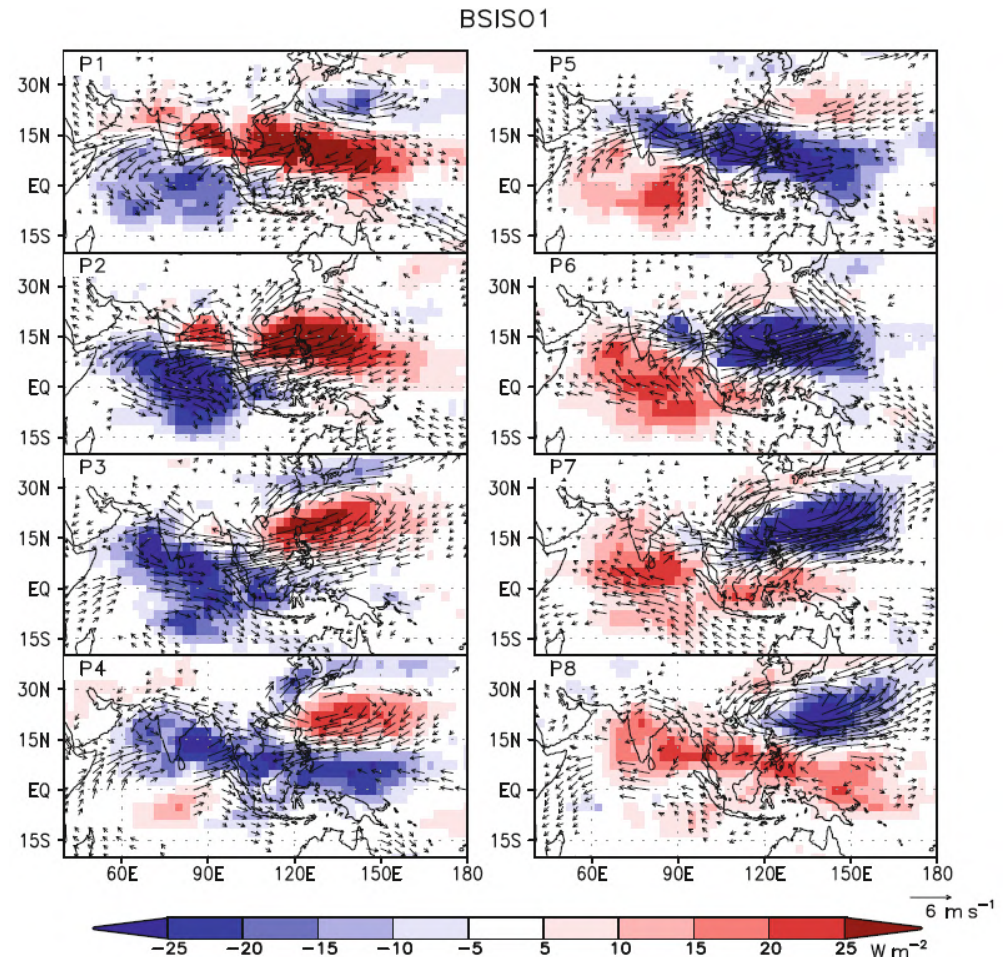

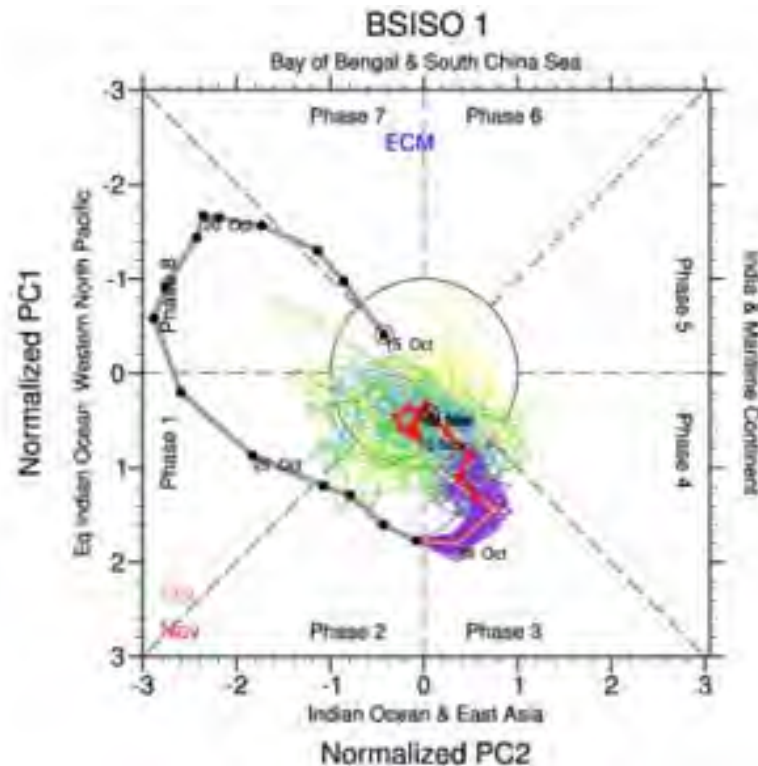

# BSISO(Boreal Summer Intraseasonal Oscillation) Prediction

- Since 2013, APCC has expanded climate service from seasonal to subseasonal timescale by providing BSISO real-time forecasts for upcoming 20 days. It is available from May to October at APCC webpage.
- For the real-time forecast, the Lee et al. (2013) BSISO index is applied.

# BSISO(Boreal Summer Intraseasonal Oscillation) Prediction

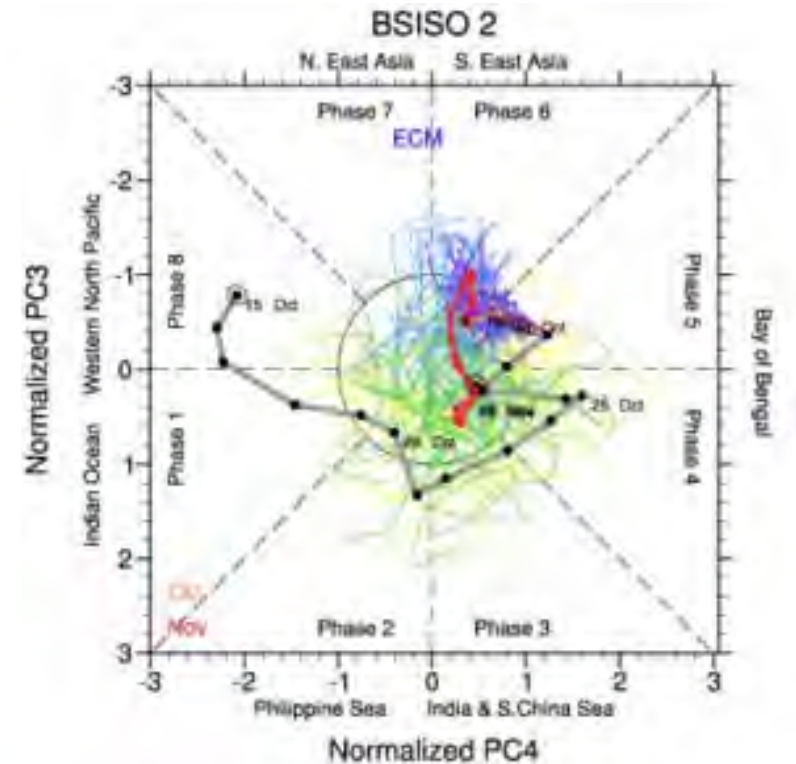

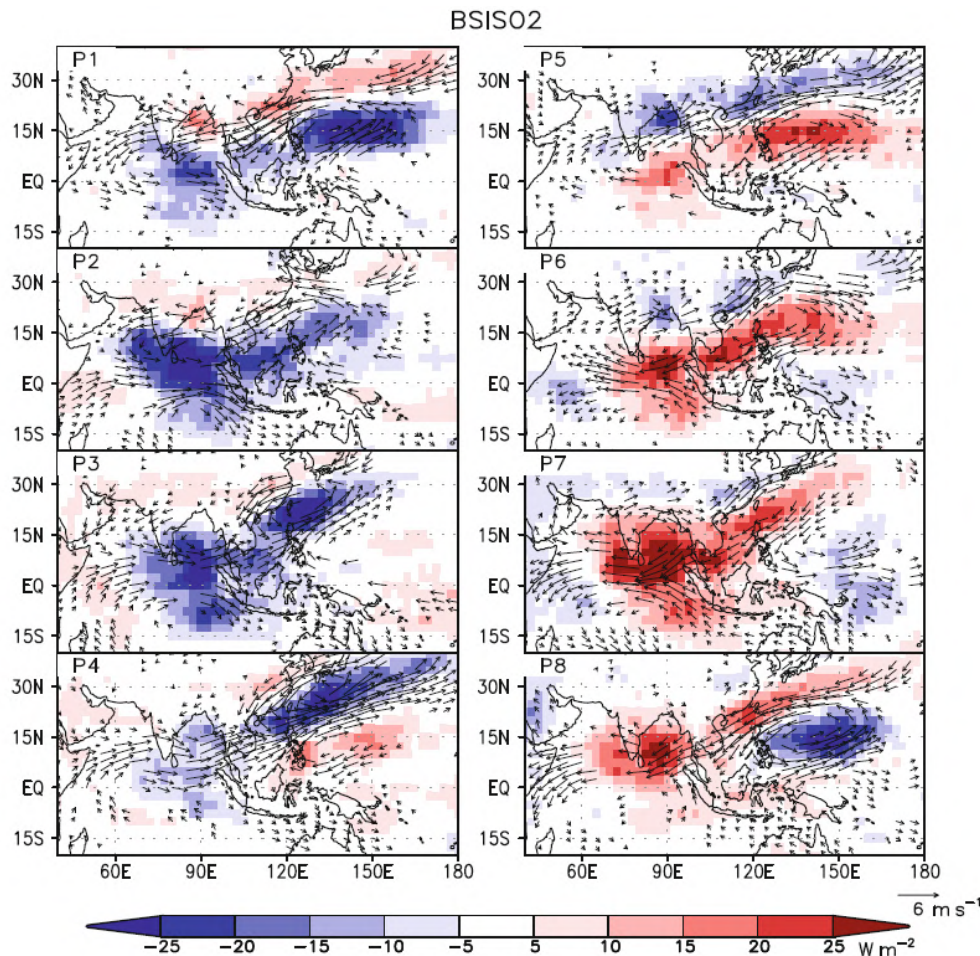

- BSISO1 : canonical northward propagating BSISO over ASM region with 30-60 days quasi-oscillating period

# BSISO(Boreal Summer Intraseasonal Oscillation) Prediction

- BSISO2 : pre-monsoon and onset mode with periods of both around 30 days and 10-20 days

# APCC BSISO Prediction System

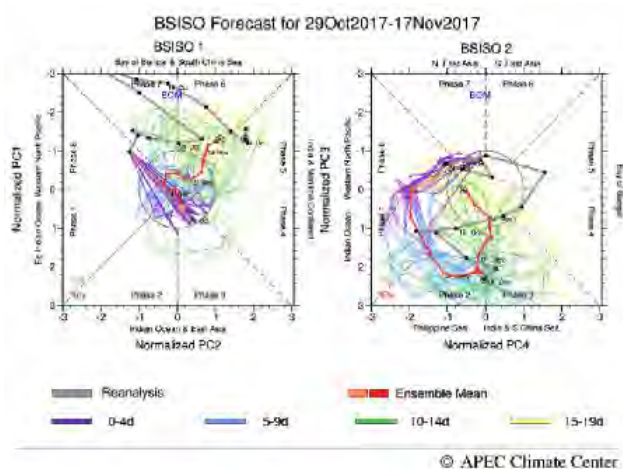

- In corporation with MJO Task Force, Multi-Institutional Cooperation

Institute	Model	Ensemble Size	Forecast Period	Update frequency	Resolution
NCEP	Climate Forecast System	4	40 days	Once a day	T126 L64
	Global Forecast System	1	16 days	Once a day	T574, T190 L64
Australia	POAMA 2.4 multi-week model	33	40 days	Twice per week	T47 L17
ECMWF	ECMWF Ensemble Prediction System	51	32 days	Twice per week	T639, T319 L62
UK Met Office	MOGREPS-15	24	15 days	Once a day	60km L70
Taiwan CWB	CWB EPS T119	6	40 days	Every 5 days	T119 L30

# BSISO Forecast Products

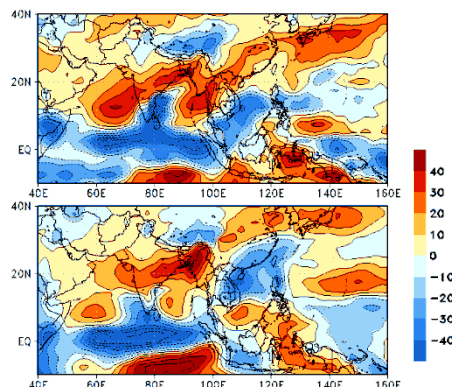

- Daily forecast of BSISO index
- 5-day mean OLR anomaly
- Probability of heavy rainfall for week1&2 predicted by BSISO index
- Verification results (hindcast, realtime forecast)

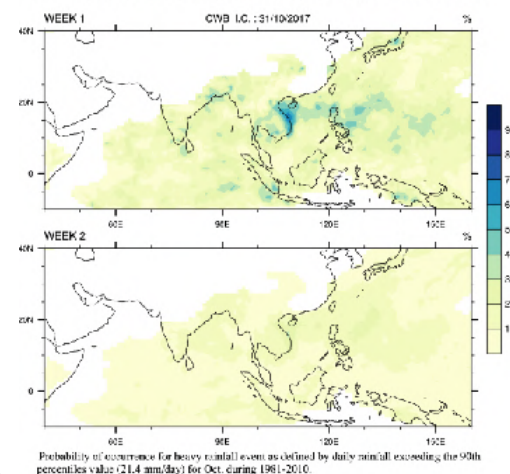

Initial Date  
(30/10/2017)

Days 1-5 Ave  
forecast

Days 6-10 Ave

# Better forecast? *practical use*

**Reliable  
forecast**

**Reasonable  
interpretation**

**Recognition  
of the value**

**Actionable  
information**

# Better forecast from better understanding on BSISO

## Extended forecast over Asia-monsoon region estimated by BSISO forecasts

OBS fields estimated by BSISO index: 20160630

B1: 4

B2: 8

(a) OLR & 850hPa Wind

(b) PRCP

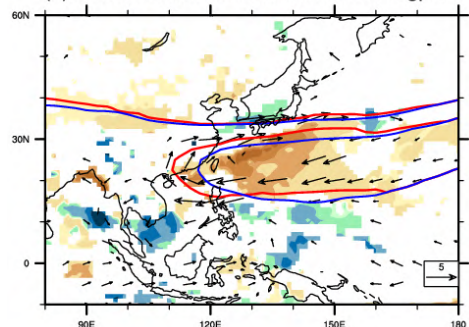

(c) SLP & Moist. Flux & Moist. Conv.

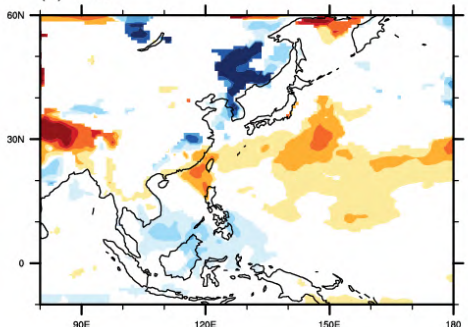

(d) T2M

(a) PRCP & 850hPa Wind & 5820/5880gpm

(b) T2M

(c) PRCP

(d) T2M

### Monitoring, Forecast, Verification

- ❖ Asia monsoon region  
: General circulation pattern, Tropical cyclone, Heavy rainfall
- ❖ India  
: Monsoon onset, Heat wave
- ❖ East Asia including S.Korea  
: Meiyu, Changma, Extreme heat

# Better forecast from better understanding on BSISO

Extended forecast over Asia-monsoon region estimated by BSISO forecasts

Forming into the BSISO Weekly Bulletin (at the pilot stage for regular operation)

❖ Updated every Monday from May to Oct.

BSI

## Verification

- Period : 08 June ~ 16 June
- BSISO 1 : **nonactive** 한 상태로 제  
모달들이 **nonactive** 한
- BSISO 2 : 약하게 유지되다가 p5-  
모달들이 관측의 강화를

## Monitoring

### 2. Indian monsoon area

- 현재 +IOD
- BSISO와 관측된 대기 순환상도
- BSISO 1로 인해 Anomalous 동풍  
Indo monsoon 이 강화되거나 북

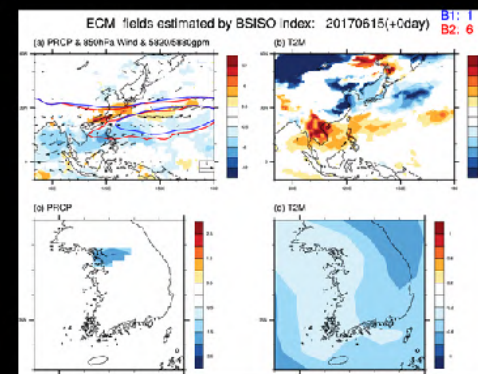

## Forecast

### 1. ECMWF (I.C. 15Jun)

- : BSISO1 : P18→nonactive→P34
- : BSISO2 : P4→nonactive

### | S.Korea |

- L15~20 : 장마 전선 남부(심지어 중  
부) 상륙 (30일)
- 장마비는 평년 or 평년 보다 적을 것  
으로
- 북태평양 고기압 (5680gpm) 서쪽으로  
확장
- L0~5 : 동해안 cool
- L6~14 : 남한(한반도) cool
- L15~20 : 북서부(북한) cool
- 기존 **ano** 이 중국-한국 동시 내비

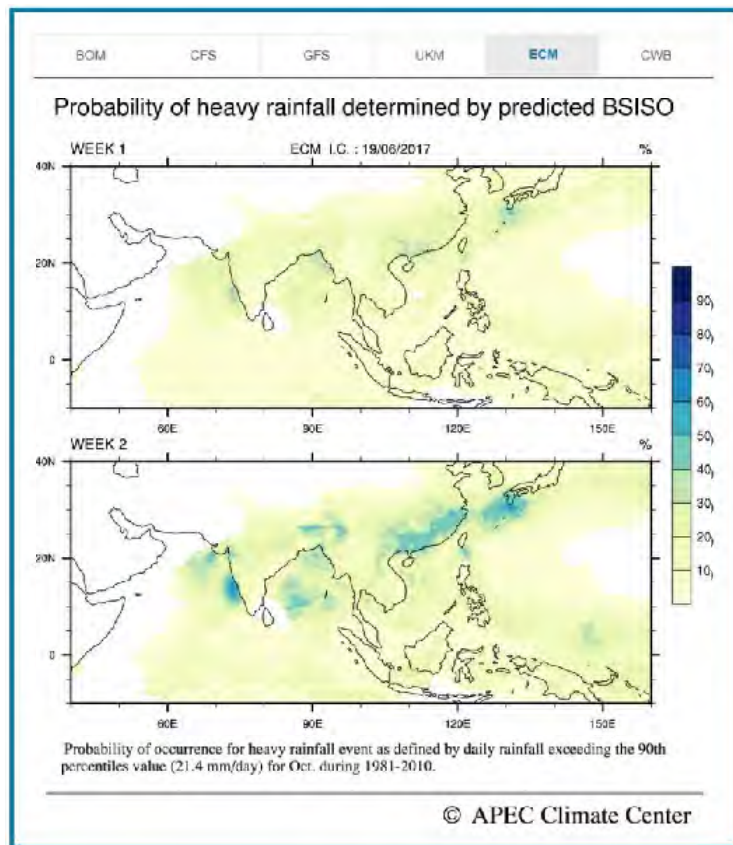

# Better forecast from better recognition of the value

## Development of a guideline to increase practical use of BSISO forecast

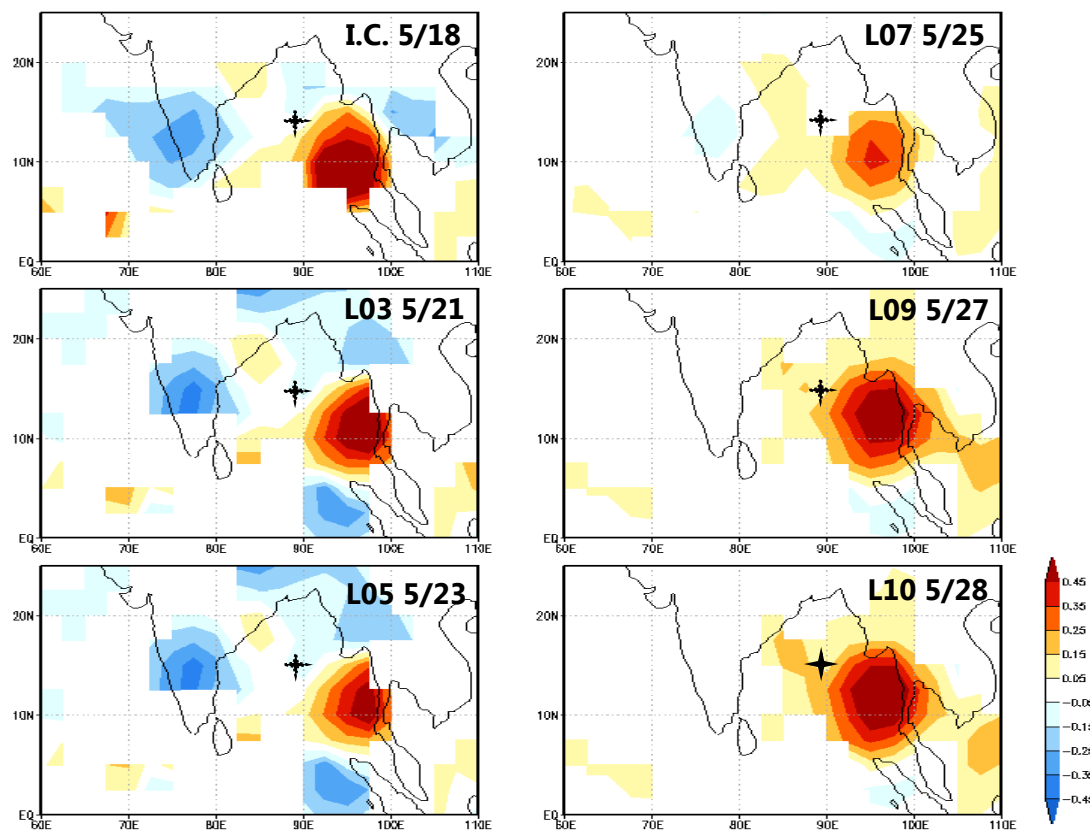

### Heavy rainfall forecast based on BSISO index forecast [ECMWF]

❖ Ex> Japan flood, 398mm/4hr, July 6, 2017

### ISGPI forecast estimated by BSISO index forecast [ECMWF]

❖ Ex> Tropical Cyclone Mora-17, May 28, 2017

# Better forecast from better recognition of the value

Development of a guideline to increase practical use of BSISO forecast

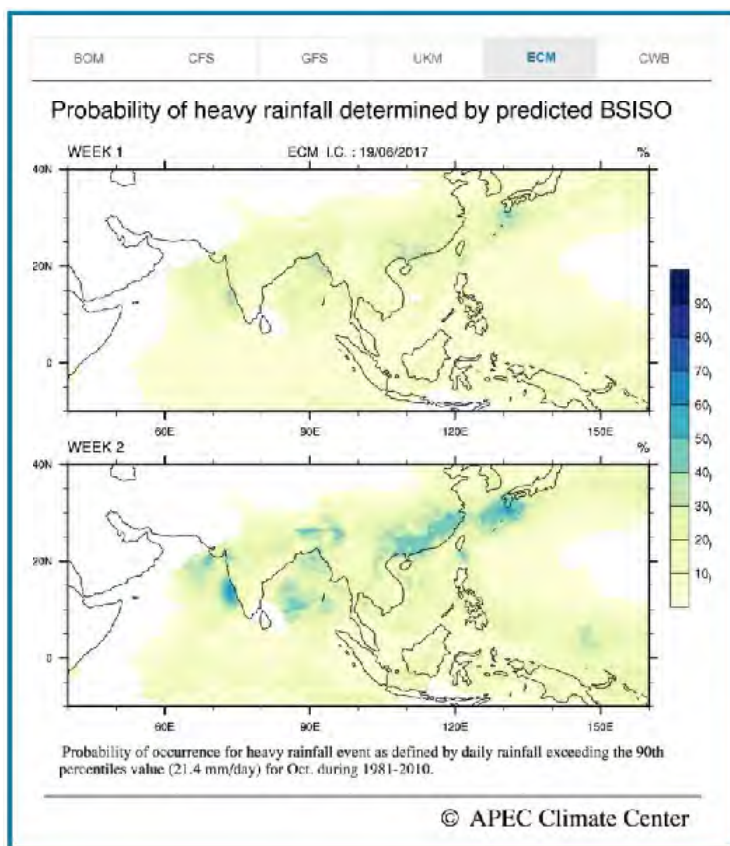

**Probability table marked with favorable wind condition  
which can contribute strong Indo-China monsoon and bring heavy rainfall.**

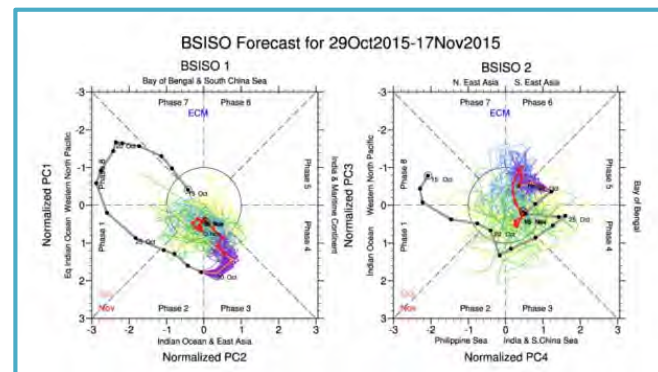

# Better forecast by actionable information

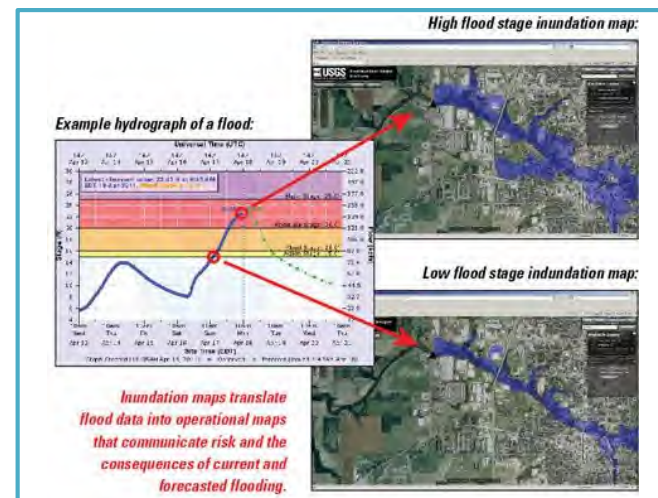

## Heavy rainfall forecast

# International Cooperation

## ✓ APCC's S2S Training Program (1-week)

- Every 2 years, APCC has trained about 20 participants from developing countries
- 2014 : S2S to cope with high impact weather
- 2016 : S2S to cope with extreme hydrological events
- 2018 : S2S prediction and APCC

# Summary

- APEC Climate Center (APCC) is a leading operational center providing seasonal forecast based on the **Multi-Model Ensemble** (MME) prediction system.
- MME seasonal prediction is one of the **most reliable** seasonal forecast information at present.
- APCC has produced **real-time BSISO forecast** using multi-models based on the international cooperation.
- The goal of APCC's BSISO forecasting activity is to produce better forecast by promoting **practical use** of real-time BSISO information.

# Summary

- Along with pursuing **more reliable forecast**, we've made an effort to **improve our understanding** on BSISO forecast and created **user friendly information**.
- In order **to arouse the people to the value of BSISO** forecast, the possibility of BSISO application is estimated and which would be the cornerstone for making **actionable information**.
- APCC's BSISO forecasting activity has become the origin of **APCC's S2S Training program** that takes places every two years.

# THANK YOU
